High Achievers

Map of the U.K.

Amy Johnson (10-07-03 to 05-01-41)

Amy Johnson was an aviator (someone who flies planes). She is Britain's most famous female pilot. She was the first woman to fly solo from the U.K. to Australia, it took 19 days! She continued to set records and during WWII she flew aeroplanes for the RAF.

Mary Seacole 1805-1881

Mary Seacole was born in Jamaica in 1805. In 1844, she helped care for people with Yellow Fever, a disease that spread very quickly and made lots of people ill.

She later travelled to help soldiers injured in the Crimean War but was turned away because of the colour of her skin.

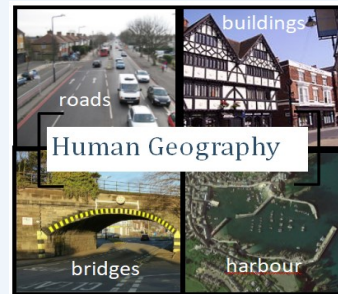

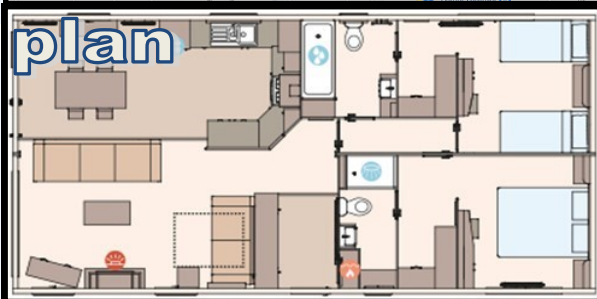

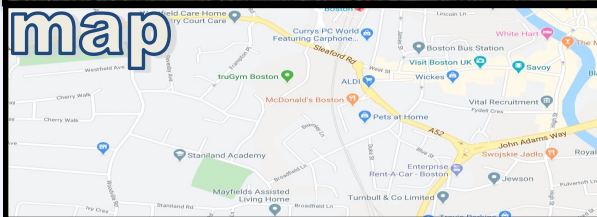

Mary set up her own hospital, which she called the 'British Hotel', where she treated the injured soldiers herself.

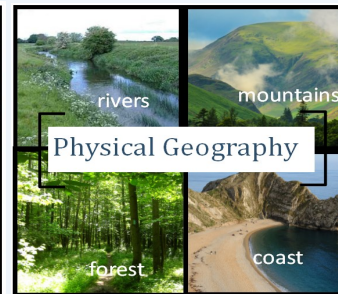

Helen Sharman (30-05-63)

Helen Sharman is a scientist (chemist) who became the first British astronaut in 1991. She spent nine days on the Russian space station Mir carrying out scientific tests.

Her father was a student at Boston Grammar School.

Human Geography

Physical Geography

Physical features—naturally occurring. Includes: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, plants, season and weather.
